linkedin.com/in/juanc-dominguez

Web developer based in Madrid. I build SaaS products and automations for small businesses with Next.js, TypeScript, Supabase and n8n, connecting software to real business needs: payments, bank data, AI and WhatsApp. Before tech, I led teams and solved problems in high-pressure operations. Looking for a web development internship, hybrid or remote.

## EXPERIENCE

### Founder · WhatsApp Automation
2026 – present

JST Commerce · Remote

- I design and build WhatsApp bots with n8n for businesses. First client: a Shopify store in the Dominican Republic.
- The bot confirms orders, turns the customer's shared location into a shipping address and answers questions with AI (Gemini), handing off to a human when needed.
- Built the services website (jst-commerce.com) and the client portal, with Stripe billing and Supabase as the data layer.

### Problem Solve
Apr 2023 – May 2026

Amazon · California and Texas, USA

- Resolved 10–15 issues per week involving item location, barcodes and product identification, keeping operations running with minimal disruption.
- Top 7% in picking accuracy at the site for two consecutive weeks.
- Internal transfer from California to Texas; completed internal IT support training.

### Team Manager
Feb 2019 – Nov 2021

Peperoni · Santo Domingo, Dominican Republic

- Promoted from server to manager. Led and trained a team of 12.
- Improved order flow, introduced a customer feedback system and managed inventory and purchasing.

## PROJECTS

### Reportes Pymes
reportes-pymes.app

- Cash-flow SaaS for US small businesses: connects bank accounts via Plaid, categorizes transactions with AI and shows income, expenses and net in real time, with budgets and reports.

Next.js · TypeScript · Supabase · Plaid · Stripe · Resend · PostHog · Sentry

### Portfolio
juansint.github.io

- Personal site in framework-free HTML, CSS and JavaScript, with an interactive canvas background and a perfect Lighthouse score.

HTML · CSS · JavaScript · GitHub Pages

## SKILLS

**Frontend**

HTML, CSS, JavaScript, TypeScript, React, Next.js

**Backend & data**

Node.js, Supabase (PostgreSQL), SQL, Java

**Automation & AI**

n8n, WhatsApp Cloud API, Gemini, Claude

**Integrations**

Stripe, Plaid, Shopify, Resend, PostHog, Sentry

**Tools**

Git, GitHub, Vercel, Cloudflare

## EDUCATION

**Higher Technician in Web App Development (DAW)**
thePower · Madrid · 2026 – 2028

**Specialization Master's in Data Analytics**
thePower (private degree) · 2026 – 2028
